Its title is "The Conspiracy and Subversion  
Potential Associated with Civil Disturbances."

25X1A9a

[REDACTED] subject has been interpreted by  
NPIC and Security as controversial since it deals  
with civilian and internal affairs. We were direct-  
ed to tell [REDACTED] to diplomatically remove  
himself from this project and find another more  
suitable for an Agency employee. No comment.

2. Our "kickouts" (items not accepted by the computer  
for input because of some error on the item) for the last  
quarter were returned to AIR from OCS this week. Altogether,  
we submitted 1,844 items for input in the quarter. Kickouts  
are returned to us in the form of two error lists -- the update  
list and the edit list. The update list reflects 27 errors; the  
edit list shows 44 errors. So, out of 1,844 items we had  
only 71 errors. In other words, our girls are readying their  
material for input at a 97% accuracy level. The rest of OTR  
should work so good!
